

### 3.1 Option Appraisal

Decisions on which schemes to implement must be informed by their comparison through appraisal.

## 3.2 Modelling

Models can be used to inform the development of transport and land-use strategies or schemes (either separately or together). They range from simple spreadsheet calculations through network assignment models, to full land-use transport interaction models.

**25** How *important* do you consider it to be for your authority to be able to **model** the following policy instruments?

(Please choose *ONE* answer from the scale below for each instrument by placing a cross in the appropriate box)

Are there any new modelling requirements such as behavioural responses or output requirements which current models do not address?
